a. from      b. as      c. with      d. at
- Mawada is the same .....as Rahma.  
a. age      b. old      c. young      d. older

### 3) Read the following passage, then answer the questions:

If we look around us we see motion happening everywhere. We see it in the movement of vehicles, people walking, aeroplanes flying, a ball rolling and animals running. Basically, it is an important part of our lives. However, there is much more to motion and it has a great **impact** on many things that we are part of. We can watch things around us move. When something is in motion, it changes its position. Objects can move from one place to another. They can move in many directions. If you roll a ball, it might move in a straight line. **It** might also move in a curve. A swing can move back and forth. A light switch can move up and down. Fans have blades that move in a circle. If you want to know if something is moving, you can compare it to other things around it that are not moving. If the things behind the object are changing, the object is probably moving. If they are not changing, the object is probably no moving.

You can measure the distance an object moves. Just measure the distance between where it was when it started to move and where it was when it stopped.

Distance can be measured in inches, feet, yards or miles. Those measurements are in the customary system. It can also be measured in millimetres, centimetres, metres and kilometres. Those measurements are in the metric system.

17. When something is in motion, what does it change?

- a. Size.                      b. Height.                      c. Position.                      d. Weight.

18. How does a swing move?

- a. Up and down                      b. Back and forth                      c. Back and up                      d. Back and right

19. What are the units of measurements you could use to measure distance?

- a. Inches, feet, yards or miles.                      b. Inches, pounds, grimes or miles.  
c. Tones, kilograms, yards or miles.                      d. Hectares, feet, tones or miles.

20. We know that something is moving when .....

- a. it makes noise                      b. objects behind it are changing  
c. balls are moving around it                      d. it exceeds a mile

21. A distance between the start point of the object and the ending point means that the object .....

- a. moved                      b. was stable                      c. is heavy                      d. will move

22. The word 'impact' in the passage can be replaced by the word .....

- a. move                      b. effect                      c. change                      d. response

23. The underlined pronoun 'it' refers to a .....

- a. moving object                      b. direction                      c. straight line                      d. ball

### 4) Translate into Arabic:

24. When you give a person a quality education, you not only revive a nation, but also you help them to think and create to be a good citizen.

### 5) Translate into English:

٢٥. إن تناول وجبة غذائية صحية وتدريباً يومياً منتظماً هما الطريقتان الأفضل للحصول على صحة جيدة ومظهر رائع.
